出版論文

- [P1] Generalized Eigenspaces and Pseudospectra of Nonnormal and Defective Matrix-Valued Dynamical Systems (with Saori Morimoto and Makoto Katori), to appear in KIAS Springer Series in Mathematics. Available at <https://arxiv.org/abs/2411.06472/>
- [P2] Eigenvalue and pseudospectrum processes generated by nonnormal Toeplitz matrices with rank 1 perturbations (with Saori Morimoto and Makoto Katori), *International Journal of Mathematics for Industry* **17** (2025), 2550013.
- [P3] Enumeration of connected bipartite graphs with given Betti number (with Taro Hasui and Satoshi Yabuoku). *Aequat. Math.* **99** (2025), 2099—2134.
- [P4] A remark on elephant random walks via the classical law of the iterated logarithms for self-similar Gaussian processes (with Shuhei Shibata). *Illinois Journal of Mathematics* **69** (2025), 567–582.
- [P5] Spectral zeta function and ground state of quantum Rabi model (with Fumio Hiroshima). *Journal of Functional Analysis* **289** (2025), no.3, 110901.
- [P6] Weighted Point Configurations with Hyperuniformity: An Ecological Example and Models (with Ayana Ezoe and Makoto Katori). *Journal of the Physical Society of Japan* **94**, 064002 (2025).
- [P7] Accumulated spectrograms for hyperuniform determinantal point processes (with Makoto Katori and Pierre Lazag). *Journal of Mathematical Physics* **66**, 063504 (2025).
- [P8] Fiber decomposition of non-commutative harmonic oscillators by two-photon quantum Rabi models (with Fumio Hiroshima). *Journal of Mathematical Physics* **66**, 032101 (2025).
- [P9] Characterization of Rock Pore Geometry and Mineralization Process via a Random Walk-Based Clogging Scheme (with Linh Thi Hoai Nguyen and Takeshi Tsuji). *Algorithms* **18**, 68 (2025).
- [P10] Torsion-weighted spanning acycle entropy in cubical lattices and Mahler measures (with Yasuaki Hiraoka). *Journal of Applied and Computational Topology* **8** (2024) 1575–1605.
- [P11] A limit theorem for persistence diagrams of random filtered complexes built over marked point processes (with Kiyotaka Suzuki). *Modern Stochastics: Theory and Applications* **10** (2023) 1–18.
- [P12] Expected number of zeros of random power series with finitely dependent Gaussian coefficients (with Kohei Noda). *J. Theor. Probab.* **36** (2023), 1534–1554.
- [P13] Local universality of determinantal point processes on Riemannian manifolds (with Makoto Katori). *Proc. Japan Acad. Ser. A Math. Sci.* **98** (2022) 95-100.
- [P14] Disordered complex networks: energy optimal lattices and persistent homology (with Subhro Ghosh and Naoto Miyoshi). *IEEE Transactions on Information Theory* **68** (2022) 5513–5534.
- [P15] Partial isometries, duality, and determinantal point processes (with Makoto Katori). *Random Matrices: Theory and Applications* **11** 2250025 (2022).
- [P16] Zeros of the i.i.d. Gaussian Laurent Series on an Annulus: Weighted Szegő Kernels and Permanent-Determinantal Point Processes (with Makoto Katori). *Commun. Math. Phys.* **392** (2022) 1099—1151.
- [P17] Local number variances and hyperuniformity of the Heisenberg family of determinantal point processes (with Takato Matsui and Makoto Katori). *J. Phys. A: Math. Theor.* **54** (2021) 165201 (22pp)

- [P18] Zeta functions of periodic cubical lattices and Cyclomatic-like polynomials (with Yasuaki Hiraoka and Hiroyuki Ochiai). *Advanced Studies in Pure Mathematics* **84** (2020), 93–121.
- [P19] Scaling limit for determinantal point processes on spheres (with Makoto Katori), *RIMS Kôkyûroku Bessatsu* **B79** (2020), 123–138.
- [P20] A mixed optimal control approach for upstream fish Migration (with Hidekazu Yoshioka and Daisuke Tagami). *Journal of Sustainable Development of Energy, Water and Environment Systems* **7** no.1 (2019), 101–121.
- [P21] On the zeros of Macdonald functions (with Yuji Hamana and Hiroyuki Matsumoto). *Opuscula Math.* **39**, no. 3 (2019), 361–382.
- [P22] Mathematical Modeling of Rock Pore Geometry and Mineralization: Applications of Persistent Homology and Random Walk (with T. Tsuji, F. Jiang, A. Suzuki). *Agriculture as a Metaphor for Creativity in All Human Endeavors* **28** 95-109, 2018.
- [P23] Pore Geometry Characterization by Persistent Homology Theory (with Fei Jiang and Takeshi Tsuji). *Water Resources Research (AGU)* **54** (2018), 4150–4163.
- [P24] Minimum spanning acycle and lifetime of persistent homology in the Linial-Meashulam process (with Yasuaki Hiraoka). *Random Structures and Algorithms* **51** (2017), 315–340.
- [P25] Tail asymptotics of signal-to-interference ratio distribution in spatial cellular network models (with Naoto Miyoshi). *Probability and Mathematical Statistics* **37** (2017), 431–453.
- [P26] Limit theorems for persistence diagrams (with Yasuaki Hiraoka and Khanh Duy Trinh). *Annals of Applied Probability* **28** (2018), 2740–2780.
- [P27] Solvable and algebraic systems on infinite ladder (with E. Verbitskiy). *Indagationes Mathematicae* **27** (2016), no. 5, 1162–1183.
- [P28] Spatial modeling and analysis of cellular networks using the Ginibre point process: A tutorial (with Naoto Miyoshi). *IEICE Transactions on Communications* **E99-B** (2016), no.11, 2247–2255.
- [P29] Quasi-symmetries and rigidity for determinantal point processes associated with de Branges spaces (with A. I. Bufetov). *Proceedings of the Japan Academy, Ser. A Math. Sci.* **93** (2017), 1–5.
- [P30] Tutte polynomials and random-cluster models in Bernoulli cell complexes (with Y. Hiraoka). *RIMS Kôkyûroku Bessatsu* **B59** (2016), 289–304.
- [P31] Absolute continuity and singularity of Palm measures of the Ginibre point process (with H. Osada). *Probability Theory Related Fields* **165** (2016), no.3, 725–770.
- [P32] Ginibre-type point processes and their asymptotic behavior. *J. Math. Soc. Japan.* **67** (2015), no.2, 763–787.
- [P33] The mean spectral measures of random Jacobi matrices related Gaussian beta ensembles (with T. K. Duy). *Electronic Communications in Probability* **20** (2015), no. 68, 1–13.
- [P34] A cellular network model with Ginibre configured base stations (with N. Miyoshi). *Advances in Applied Probability* **46** (2014), 832–845.
- [P35] Cellular networks with α -Ginibre configured base stations (with Naoto Miyoshi). *The Impact of Applications on Mathematics: Proceedings of the Forum of Mathematics for Industry 2013* pp. 211-226 (2014).

- [P36] Remarks on α -determinants via SDP relaxation, (with T. Osogami and H. Waki). *J. of Math-for-Industry* **5** (2013B-1), 1–10.
- [P37] Correlation functions for zeros of a Gaussian power series and Pfaffians (with S. Matsumoto). *Electronic Journal of Probability* **18** (2013), no. 49 1–18.
- [P38] Note on the spectrum of discrete Schrödinger operators (with Fumio Hiroshima, Itaru Sasaki and Akito Suzuki), *Journal of Math-for-Industry* **4** (2012B-4). 105–108.
- [P39] Limit theorem for random analytic functions and their zeros, *RIMS Kôkyûroku Bessatsu* **34** (2012). 335–359.
- [P40] A remark on monotonicity for the Glauber dynamics on finite graphs. *Proc. Japan Acad.* **86** (2010) 33–37.
- [P41] Exact computation for the cover times of certain classes of trees (with Y. Higuchi and T. Ohwa), *Journal of Math-for-Industry* **2** (2010A-9), 93–98.
- [P42] Joint distribution of the cover time and the last visited point of finite Markov chains (with T. Ohwa). *Kyushu J. Math.* **62** (2008), 281–292.
- [P43] Variance of the linear statistics of the Ginibre random point field (with H. Osada). *RIMS Kôkyûroku Bessatsu* **B6** (2008), 193–200.
- [P44] Remarks on the positivity of α -determinants, *Kyushu J. Math.* **61** (2007), 169–189.
- [P45] Non-bipartiteness of infinite graphs and upper bound of Dirichlet forms (with Yu. Higuchi). *Potential Analysis* **25** (2006), 259–268.
- [P46] Large deviations for the fermion point process associated with the exponential kernel. *J. Stat. Phys.* **123** (2006), 615–629.
- [P47] Some spectral and geometric properties for infinite graphs (with Yu. Higuchi). *Contemp. Math.* **347** (2004), 29–56.
- [P48] Random point fields associated with fermion, boson and other statistics (with Y. Takahashi). *Adv. Stud. Pure Math.* **39** (2004), 345–354.
- [P49] Random point fields associated with certain Fredholm determinants II: fermion shifts and their ergodic and Gibbs properties (with Y. Takahashi). *Ann. Probab.* **31** (2003), 1533–1564.
- [P50] Random point fields associated with certain Fredholm determinants I: fermion, Poisson and boson point processes (with Y. Takahashi). *J. Funct. Anal.* **205** (2003), 414–463.
- [P51] Long time behavior of the transition probability of a random walk with drift on an abelian covering graph. *Tohoku Math. J.* **55** (2003), 255–269.
